

*****Important notice from the Town of Madawaska and the
Pollution Control Department*****

During this Public Health Emergency, we understand that our residents will utilize all means of home disinfection / sterilization resources available to protect family health. The Town of Madawaska absolutely encourages all residents to utilize the home sanitation and virus disinfection resources available to them.

It is important to remind the residents who are users of the Town Sewer System that some of the home disinfection /sterilization products commonly used today cannot be flushed in the toilet as these products cannot be processed by the pumping systems and can cause severe sewer line back-ups. As such, the items that cannot be flushed are:

Baby wipes

Disinfecting wipes

Paper Towels

Facial / Nose Tissues

We thank-you for your understanding and hope that you all stay safe and healthy during this time. Any persons with questions or concerns regarding this notice can contact the Pollution Control Department at 207-728-3608, or by email at
